

## Spring replacement instructions for press button on side hinge

### Tools needed:

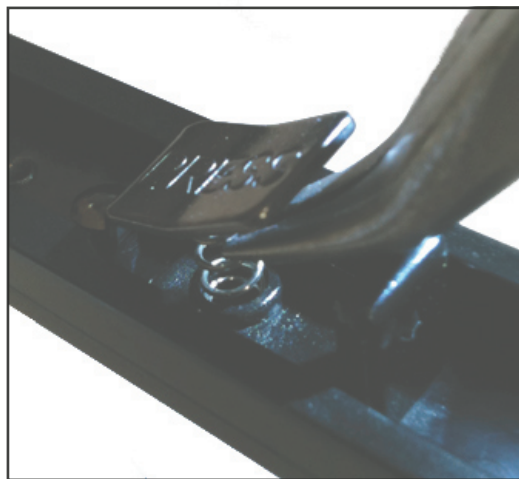

- A. Flathead screwdriver
- B. Needle nose pliers

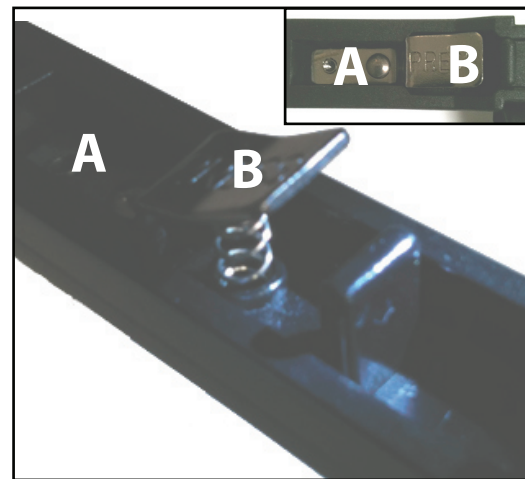

- 1.) Place the flathead screwdriver underneath the PRESS button and gently lift it slightly upward.

- 2.) Below the PRESS button is a hole to place the spring.

- 3.) With pliers, place the spring standing up into the hole and underneath the PRESS button.

- 4.) Use screwdriver to hold down side A (as shown above,) then with pliers or another screwdriver push down side B.
